| MW        | 397.42                                                                                                                                                                                                                                                                                                                                                                                      |
| Storage   | 2 years -20°C Powder, 2 weeks 4°C in DMSO, 6 months -80°C in DMSO                                                                                                                                                                                                                                                                                                                           |
| Structure |  <p>The chemical structure of PCI-24781 is shown. It features a benzofuran core with a dimethylamino group at the 2-position, a carbonyl group at the 3-position, and a hydroxamic acid group at the 4-position. The carbonyl group is linked via an amide bond to a 4-(hydroxamic acid)benzyl group.</p> |
| Purity    | >98%                                                                                                                                                                                                                                                                                                                                                                                        |
